Vice President of Development | Enterprise Engineering Executive

SUMMARY

Enterprise engineering leader with 8+ years at Florida Credit Union delivering modernization in a regulated, compliance-sensitive financial environment. Known for DevOps and CI/CD transformation, platform modernization, and data governance that improve release reliability and accuracy. Leading the organization's AI adoption, from security policy and guardrails to piloting AI-assisted development.

SIGNATURE OUTCOMES

- Cut deployment cycle time by 40% through CI/CD standardization and containerized releases (Docker, Kubernetes).
- Prevented 278 production bugs in the first year of GitLab CI/CD adoption.
- Improved enterprise data accuracy by 30% via validation automation and reporting controls.
- Established company-wide AI governance: Claude and OpenAI security policies and guardrails, now piloting AI-assisted development.

CORE COMPETENCIES

Engineering and People Leadership • Enterprise Application Delivery • Platform Modernization • DevOps and CI/CD • Containerization • AI Governance and Adoption • Data Quality and Governance • Vendor Management • Risk Reduction • Executive Stakeholder Management • Hands-on Technical Depth (C#, .NET, Python, SQL Server)

PROFESSIONAL EXPERIENCE

Florida Credit Union | Dec 2017-Present

Vice President of Development | 2025-Present

- Report to the CIO; lead the development and computer operations teams that build and support mission-critical, regulated systems used across the entire organization.
- Manage 5 technology vendor relationships, holding partners accountable for delivery, support, and service quality.
- Established Claude and OpenAI security policies and company-wide AI guardrails; piloting AI-assisted development with select engineers ahead of broader adoption.
- Modernized core platforms: upgraded and redesigned SharePoint from 2016 to Subscription Edition, upgraded the Kentico CMS, and led data warehouse upgrades and migrations.
- Delivered an estate-settlement workflow for a sensitive, compliance-driven member servicing process.
- Lead CI/CD pipelines and containerized deployments, cutting deployment time by 40% and improving release reliability.
- Implement validation and reporting controls, improving data accuracy by 30% and reducing downstream errors.
- Designed and implemented a full inventory system for new-building vending machine and supply management, enabling accountability, reorder controls, and real-time visibility.
- Rebuilt the quote/approval workflow application with document attachments, version control, approval controls, workflow comments, and administrative settings to strengthen governance and streamline approvals.

Assistant Vice President (AVP) / Developer Lead | 2021-2025

- Led 5 direct reports across two teams delivering enterprise applications and internal automation platforms.
- Directed development of an enterprise onboarding platform for regulated workflows, reducing manual entry and eliminating errors.
- Built a pricing and approvals module for regulated decisioning that eliminated approval discrepancies and strengthened controls.
- Spearheaded GitLab CI/CD adoption, preventing 278 production bugs in its first year.
- Implemented a SharePoint intranet, reducing internal email traffic by 80% and improving collaboration.

Developer | 2017-2021

- Designed and developed enterprise applications supporting regulated operations and internal automation initiatives.
- Engineered database-driven reporting and validation systems improving data integrity and operational accuracy.
- Built automated workflows and reporting tools reducing manual processes and strengthening internal controls.

Veterans Trading Company (VTC) | 2015-2017

Planning & Configuration Management Lead

- Led a team of 3 overseeing configuration and inventory systems for defense manufacturing.
- Designed a Power BI inventory dashboard that reduced excess inventory carrying value by 70% while improving demand forecasting.
- Directed implementation of smart inventory systems integrating automated imports and real-time reporting.
- Partnered with Lockheed Martin on supply chain planning, improving production efficiency and reducing risk.

EDUCATION

Santa Fe College - BS, Information Systems Technology (Programming) (Expected May 2027)

Santa Fe College - AS, Programming and Analysis, 2022

Santa Fe College - State Certificate, Computer Programming Specialist, 2021

TECHNICAL PROFICIENCIES

Tech: C#, .NET, Python, SQL Server, React, JavaScript, HTML/CSS

DevOps: GitLab, Git, Docker, Kubernetes, PowerShell

Enterprise: Power BI, Data Warehousing, Reporting Dashboards, Active Directory, SharePoint Subscription Edition, Kentico CMS

AI: Claude, OpenAI, AI-Assisted Development, AI Security Policy and Guardrails
