Vice President of Development | Enterprise Engineering Executive

SUMMARY

Enterprise engineering leader with 9+ years delivering modernization in regulated, compliance-sensitive environments. Known for DevOps and CI/CD transformation, operational risk reduction, and financial data governance that improves release reliability and accuracy.

SIGNATURE OUTCOMES

- Cut deployment cycle time by 40% through CI/CD standardization and containerized releases (Docker, Kubernetes).
- Prevented 278 production bugs in the first year of GitLab CI/CD adoption.
- Improved financial data accuracy by 30% via validation automation and reporting controls.
- Reduced facility inventory valuation by 70% using Power BI dashboards and improved forecasting.

CORE COMPETENCIES

Engineering and People Leadership; Enterprise Application Delivery; Platform and DevOps; CI/CD; Containerization; Financial Systems Automation; Data Quality and Governance; Risk Reduction; Executive Stakeholder Management; Hands-on Delivery (C#, .NET, Python, SQL Server).

PROFESSIONAL EXPERIENCE

Florida Credit Union | 2024-Present

Vice President of Development

- Lead development teams delivering enterprise applications for finance, compliance, and operations.
- Directed CI/CD pipelines and containerized deployments, cutting deployment time by 40% and improving release reliability.
- Implemented validation and reporting controls, improving financial accuracy by 30% and reducing downstream errors.
- Partner with executives to align delivery roadmaps to strategy, driving efficiency and reducing operational risk.
- Mentor senior developers and managers, establishing standards that scale productivity and quality.
- Leverage AI as a force multiplier for planning and architectural decision support; progressing toward structured team adoption.

Florida Credit Union | 2017-2024

Developer Lead / Assistant Vice President (AVP)

- Led 5 direct reports across two teams delivering enterprise applications.
- Delivered a commercial loan onboarding platform that reduced manual entry and eliminated errors.
- Built a compliant commercial pricing module that eliminated loan approval discrepancies and strengthened controls.
- Spearheaded GitLab CI/CD adoption, preventing 278 production bugs in its first year.
- Implemented a SharePoint intranet, reducing internal email traffic by 80% and improving collaboration.

Veterans Trading Company (VTC) | 2015-2017

Configuration Management Lead

- Led a team of 3 overseeing configuration and inventory systems for defense manufacturing.
- Designed a Power BI dashboard that reduced facility inventory value by 70% while improving demand forecasting.
- Partnered with Lockheed Martin on supply chain planning, improving production efficiency and reducing risk.

EDUCATION

BS, Computer Science - University of Florida Online (Expected 2026)

AS, Information Systems and Technology (Programming) - Santa Fe College, 2022

TECHNICAL PROFICIENCIES

Tech: C#, .NET, Python, SQL Server, React, JavaScript, HTML/CSS

DevOps: GitLab, Git, Docker, Kubernetes, PowerShell

Enterprise: Power BI, Reporting Dashboards, Active Directory, SharePoint
