Vice President of Development | Software Engineering, Data & Analytics Leader

SUMMARY

Credit union technology executive with 8+ years in the industry, including 5+ years in management, leading software engineering, data, and computer operations in a regulated financial institution. Reports to the CIO; owns enterprise data governance approvals, data warehouse disaster recovery, and organization-wide reporting for NCUA and internal audits. Known for SDLC and release management modernization, data quality improvement, and policy development, including company-wide AI security policy and guardrails.

SIGNATURE OUTCOMES

- Improved enterprise data accuracy by 30% via validation automation and reporting controls.
- Own enterprise data governance: all vendor data integrations, data-sharing requests, and new data collection require review and approval under standards the team created and maintains.
- Cut deployment cycle time by 40% through CI/CD standardization and containerized releases (Docker, Kubernetes).
- Prevented 278 production bugs in the first year of GitLab CI/CD adoption.
- Established company-wide AI governance: Claude and OpenAI security policies and guardrails, now piloting AI-assisted development.

CORE COMPETENCIES

Software Engineering and Data Leadership • SDLC and Release Management • Enterprise Data Governance and Data Quality • Data Warehousing and Business Intelligence • Data Disaster Recovery • Regulatory Compliance and Audit Support (NCUA) • Vendor Management and Contract Negotiation • Vendor Risk and SOC 2 Review • Web Accessibility (ADA) Compliance • Policy Development • AI Governance and Adoption • DevOps and CI/CD • Agile Delivery • People Leadership and Talent Development • Hands-on Technical Depth (C#, .NET, Python, SQL Server, REST APIs)

PROFESSIONAL EXPERIENCE

Florida Credit Union | Dec 2017-Present

Vice President of Development | 2025-Present

- Report to the CIO; lead the development and computer operations teams that build and support mission-critical, regulated systems used across the organization, owning hiring, coaching, performance management, and succession planning.
- Created and maintain the data governance standards the organization practices; review and approve all vendor data integrations, requests to share data with vendors, and new data collection.
- Led data warehouse upgrades and migrations; own the data recovery portion of the disaster recovery plan, covering the data warehouse and reporting platforms.
- Provide organization-wide reporting for NCUA and internal audits; contribute vendor risk reviews, including security assessments and SOC 2 report review for cloud service providers.
- Manage 5 technology vendor relationships, holding partners accountable for delivery, support, and service quality; negotiated contracts and renewals with data and automation vendors.
- Contribute the team budget to the overall IT budget and prepare executive reporting for the CIO and CEO that supports Board presentations.
- Established Claude and OpenAI security policies and company-wide AI guardrails; piloting AI-assisted development with select engineers ahead of broader adoption.
- Implement validation and reporting controls, improving data accuracy by 30% and reducing downstream errors.
- Lead SDLC and release management using a mixed Agile approach with CI/CD pipelines and containerized deployments, cutting deployment time by 40% and improving release reliability.
- Own the organization's public website on Kentico CMS, developed by a vendor: led the upgrade to the C# version of Kentico and now leading the upgrade to the latest Kentico release; manage ADA compliance and accessibility audit processes, server maintenance, administration, and vendor widget updates.
- Modernized the intranet platform, upgrading and redesigning SharePoint from 2016 to Subscription Edition.
- Delivered compliance-driven applications, including an estate-settlement member servicing workflow and a rebuilt quote/approval system.

Assistant Vice President (AVP) / Developer Lead | 2021-2025

- Led 5 direct reports across two teams delivering enterprise applications and internal automation platforms.
- Directed development of an enterprise onboarding platform for regulated workflows, reducing manual entry and eliminating errors.
- Built a pricing and approvals module for regulated decisioning that eliminated approval discrepancies and strengthened controls.
- Spearheaded GitLab CI/CD adoption, preventing 278 production bugs in its first year.
- Implemented a SharePoint intranet, reducing internal email traffic by 80% and improving collaboration.

Developer | 2017-2021

- Designed and developed enterprise applications supporting regulated operations and internal automation initiatives.
- Engineered database-driven reporting and validation systems improving data integrity and operational accuracy.
- Built automated workflows and reporting tools reducing manual processes and strengthening internal controls.

Veterans Trading Company (VTC) | 2015-2017
Planning & Configuration Management Lead

- Led a team of 3 overseeing configuration and inventory systems for defense manufacturing.
- Designed a Power BI inventory dashboard that reduced excess inventory carrying value by 70% while improving demand forecasting.
- Directed implementation of smart inventory systems integrating automated imports and real-time reporting.
- Partnered with Lockheed Martin on supply chain planning, improving production efficiency and reducing risk.

EDUCATION

Santa Fe College - BS, Information Systems Technology (Programming) (Expected May 2027)
Santa Fe College - AS, Programming and Analysis, 2022
Santa Fe College - State Certificate, Computer Programming Specialist, 2021

TECHNICAL PROFICIENCIES

Tech: C#, .NET, Python, SQL Server, REST APIs, XML, React, JavaScript, HTML/CSS
DevOps: GitLab, Git, Docker, Kubernetes, PowerShell
Data & BI: Data Warehousing, Power BI, Reporting Dashboards, Data Governance, Data Quality Controls
Enterprise: Active Directory, SharePoint Subscription Edition, Kentico CMS
AI: Claude, OpenAI, AI-Assisted Development, AI Security Policy and Guardrails
